HOW TO MAKE A CHRISTMAS TREE FIRE RESISTANT

1. Buy freshly cut tree that hasn't dried out.
2. Cut off end of trunk, diagonally, one inch above original cut end.
3. Stand the tree in a container of water. Keep the water level above the cut surface.
4. Keep in cool shady place until ready to trim.
5. Keep tree standing in water all the time it is in use.

(over)

DO NOT

1. Do not use real candles.
2. Do not use cotton.
3. Do not use other inflammable decorations.
4. Do not place tree near fireplace or open fire.
5. Do not keep tree in house for long time.
